Preserving the past...
Inspiring the Future!

It's all about...
Team work ✦ Creative Thinking
Problem Solving
Innovation ✦ Engineering
Techniques ✦ Robots ✦ Fun
And LEGO® Bricks!

The WACO Junior Robotic Camp experience introduces young people to the exiting world of robotics!

Using the LEGO® MINDSTORMS® Technology, LEGO® Bricks and other elements such as sensors, motors, and gears, student teams conduct scientific research then design, build, and test a fully autonomous robot. Then they put their inventions to the test in a friendly challenge designed just for our camp!

Learn more about Robotic Leagues NOW FORMING!!

Participants will make a site visit to a local company to see real robots in action and see what problems they run into during a days operation.

WACO Junior Robotics Camp is true to the goals and objectives of the WACO Historical Society and to the innovative genius of WACO Founder Clayton Brukner. The camp encourages you people's curiosity and nurtures their inventiveness.

The WACO Robotic Camp will be held at Historic Waco Field located at 1865 S. County Road 25A, Troy, Ohio 45373.
